

U.S. Department of Housing and Urban Development

FHA Single-Family Mutual Mortgage Insurance Fund Programs

Quarterly Report to Congress FY 2019 Q4

Delivered: December 11, 2019

Quarterly Report to Congress on FHA Single-Family Mutual Mortgage Insurance Fund Programs

FY 2019 Q4 Data as of September 30, 2019

U.S. Department of Housing and Urban Development Federal Housing Administration

FOREWORD

On behalf of Secretary Carson and FHA Commissioner Brian Montgomery, and pursuant to requirements of section 202(a)(5) of the National Housing Act, as amended by the FHA Modernization Act of 2008 (Public Law 110-289, Page 122 Stat. 2834), I am herewith transmitting the Fiscal Year 2019 Fourth Quarter Report. This report covers mortgages that are obligations of the Mutual Mortgage Insurance (MMI) Fund of the Federal Housing Administration. The reporting period covers July 1, 2019 through September 30, 2019.

This quarterly report provides detailed information on the composition and credit quality of new insurance, and on FHA's financial position. In addition to this report to Congress, FHA provides information regarding the status of the single-family mortgage-insurance portfolio via the publication of other complementary reports. All FHA reports can be found in the Office of Housing Reading Room.

Also posted in the Office of Housing Reading Room are annual independent actuarial reviews of the MMI Fund and HUD's Annual Report to Congress on the financial status of that fund. HUD posted the Actuarial Review and Annual Report to Congress for FY 2019 on November 14, 2019. The FY 2019 Annual Report, which summarizes the independent actuary's analysis of the portfolio, includes detailed projections of future performance and discussion of economic risk to the MMI Fund. The Department is pleased to provide details to the Congress on how this report was prepared or to answer any questions about the information presented.

Sincerely,

Keith N. Becker

Kingh Bul

Deputy Assistant Secretary Office of Risk Management and Regulatory Affairs This report is in fulfillment of the requirement under section 2118 of the Housing and Economic Recovery Act of 2008 (12 USC 1708(a)(5)) that HUD report to the Congress on a quarterly basis respecting mortgages that are an obligation of the Mutual Mortgage Insurance Fund. The specific items requested under the Act are:

Mandated Item	Summary	Page	Exhibit
A) Cumulative volume of mortgage insurance commitments that have been made during such fiscal year through the end of the quarter for which the report is submitted	Single-family forward endorsements during the fourth quarter of FY 2019 increased 20.88 percent by count from the prior quarter. Single-family forward endorsement volume was \$69.68 billion, up by 27.19 percent from the prior quarter. Reverse Mortgage (HECM) endorsements by count were down 7.69 percent from the previous quarter. HECM endorsement volume, at \$2.69 billion for the fourth quarter of FY 2019, represents a decrease of 6.74 percent from the previous quarter.	<u>5</u> , <u>18</u> , <u>19</u>	1, <u>A-1</u> , <u>A-2</u>
B) Types of mortgages insured, categorized by risk	The average credit score this quarter increased to 667. Endorsement share of 720+ credit score mortgages is up 12.96 percent. The share of less than 640 credit score declined to 27.07 percent. Average property loan-to-value ratio declined to 92.39 percent. FHA has seen a decrease in the concentration of mortgages with high debt-to-income (DTI) ratios. Nearly 26 percent of all FHA-insured forward mortgage purchase transactions in this quarter were comprised of mortgages where the borrower had a DTI ratio above 50 percent.	6, 7,8, 9, 10, 19, 20, 21, 22, 23, 26	2, 3a, 3b, 4, 5, A-3, A-4, A-5, A-6, A-9
C) Any significant changes between actual and projected claim and prepayment activity	Prepayment speeds this quarter were 2.03 percent lower than predicted. Claims were 22.89 percent below predicted level by count and 33.86 percent below predicted level by dollar amount.	<u>11</u> ,	<u>6</u> ,
D) Projected versus actual loss rates	The year-to-date actual net loss rate on claim activity of 43.29 percent is	<u>11</u>	<u>6</u>

	higher than the projection of 42.11 percent.		
E) Updated projections of the annual subsidy rates	The budget execution credit subsidy rates (CSR) for FY 2019 Q4 are at -3.20 percent and -0.15 percent for forward mortgages and HECMs, respectively.	<u>12</u>	7

Additional Risk Factors	Summary	Page	Exhibit
F) MMI Fund Cash and Investments	The MMI Fund Cash and Investments account balance at the end of FY 2019 Q4 was \$55.29 billion, down from \$58.84 billion last quarter.	<u>13</u>	<u>8</u>
G) Business Operations Cash Flow	Core business-operations cash flow in FY 2019 Q4 was \$701 million this quarter. FHA paid \$3.79 billion in claims and property expenses, while receiving approximately \$4.49 billion in revenues from premium collections, sale of notes and properties, and other revenue.	<u>14</u>	<u>9</u>
H) Early Payment Delinquency	The early payment delinquency (EPD) rate declined this quarter to 0.65 percent, from 0.72 percent last quarter. This decrease is likely due to policy changes and seasonal effects.	<u>15</u>	<u>10</u>
I) Serious Delinquency Rates	The portfolio-level serious delinquency rate increased this quarter to 3.88 percent, from 3.76 percent last quarter.	<u>16</u>	<u>11</u>
J) Termination Claim Type with Loss Severity Rates	The single family forward portfolio loss rate decreased to 38.80 percent from 40.67 percent last quarter. Total loan dispositions of 9,028 are lower by 38.57 percent due to reduced REO and REO Alternatives inventory levels.	24	<u>A-7</u>
K) Cash-Out Refinancing Rates	Purchase mortgage share decreased from 75.80 percent last quarter to 71.18 percent. Cash-out refinance mortgage share decreased as a percentage of overall business to 14.84 percent from 15.46 percent last quarter. In Q4, FHA revised the maximum loan-to-value	<u>25</u>	<u>A-8</u>

Additional Risk Factors	Summary	Page	Exhibit
	(LTV) and combined loan-to-value (CLTV) percentages for Cash-out refinance mortgages from 85 percent to 80 percent to align with industry standards.		
L) Down Payment Assistance (DPA) – Serious Delinquency Rate (SDQ)	The share of Down Payment Assistance (Purchase only mortgages) increased from 38.12 percent last quarter to 39.01 percent. Generally, higher SDQ rates are associated with mortgages where down payment assistance came from self-identified governmental entities.	27	<u>A-10</u>
M) Reverse Mortgage (HECM) Program Claims	Total HECM program claims increased this quarter by 0.97 percent from 18,330 loans to 18,507 loans due to higher number of assigned Claims (Type 2 and Supplemental) to HUD.	28	<u>A-11</u>

Endorsement Activity

During the fourth quarter of fiscal year (FY) 2019, the FHA endorsed 306,230 forward mortgages for insurance, up by 20.88 percent from the prior quarter (Exhibit A-1).

The dollar volume of refinance endorsements (Conventional to FHA, FHA to FHA) in the quarter was up 54.40 percent from the previous quarter, while the dollar volume of all forward-mortgage endorsements decreased 27.19 percent (Exhibit A-2).

FHA-to-FHA refinance activity, in terms of endorsed mortgages, increased by 66.46 percent from the quarter-earlier period from 35,870 to 59,710.

HECM endorsement volume, \$2.69 billion for the fourth quarter of FY 2019, was up 6.74 percent from the previous quarter. HECM endorsement counts in FY 2019 Q4 of 7,513 was down 7.69 percent from last quarter.

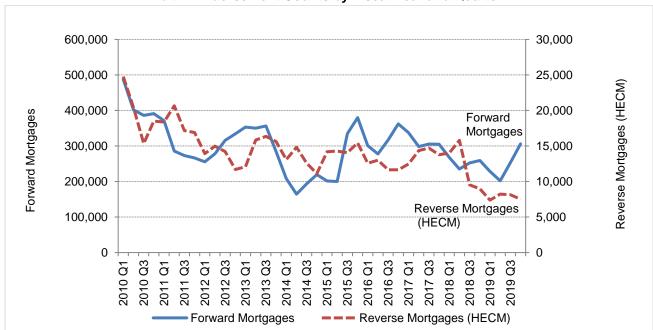

Exhibit 1. Endorsement Counts by Fiscal Year and Quarter

Borrower Credit Scores

Average borrower credit score increased to 667. Although this continues to be above the levels preceding the mortgage and credit crisis, it is well below the peak of 703 in FY 2011 Q2 (Exhibit 2, Exhibit A-4).

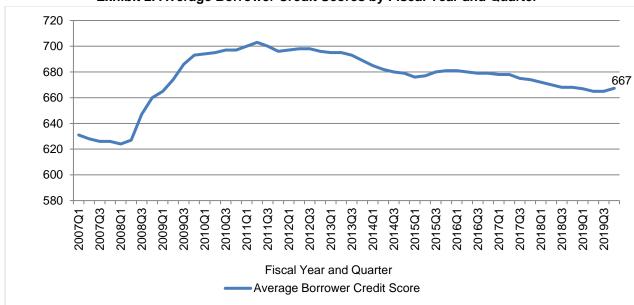

Exhibit 2. Average Borrower Credit Scores by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM endorsements. SOURCE: U.S. Department of HUD/FHA, October 2019

As shown in Exhibit 3a, the distribution of borrower credit scores has gradually changed over the past few years. The core of the distribution is in the 640–679 range (38.39 percent). In FY 2019 Q4 the share of 680–850 credit scores increased by 1.69 percent from FY 2019 Q3. (Exhibit 3a, Exhibit A-3).

In Exhibit 3a, FHA's credit risk profile has been shifting from nearly 60 percent of borrowers at greater than 680 credit scores in FY2011 to about 35 percent, currently. At the same time, less than 640 borrowers have grown to nearly 27 percent. This increase shows a much riskier population of mortgages being endorsed by FHA. Performance of low credit score mortgages will be closely monitored to determine when additional policy changes should be implemented.

In Exhibit 3b, borrowers with 720 and greater credit score increased to 12.96 percent in Q4 FY 2019 from 12.18 percent in Q3 FY 2019, while borrowers with less than 620 credit score decreased from 13.08 percent in Q3 FY 2019 to 11.73 percent in Q4 FY 2019.

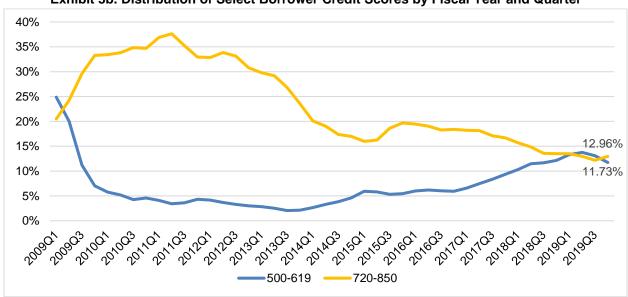

Exhibit 3b. Distribution of Select Borrower Credit Scores by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM activity. SOURCE: U.S. Department of HUD/FHA, October 2019.

Debt-to-Income (DTI)

From 2015 to FY2019 Q2 FHA saw average increases in the concentration of mortgages with high debt-to-income (DTI) ratios. High DTI ratios may preclude borrowers from having the ability to make current mortgage obligations. Almost 27 percent of all FHA-insured forward mortgage purchase transactions in FY 2019 were comprised of mortgages where the borrower had a DTI ratio above 50 percent. The last two quarters of FY2019 FHA saw a decrease in average DTI ratios from their peak, due likely to policy changes made in the first half of FY2019. FHA will continue to monitor the volume of mortgages coming in at high DTI ratios to mitigate any excessive risk to the MMIF.

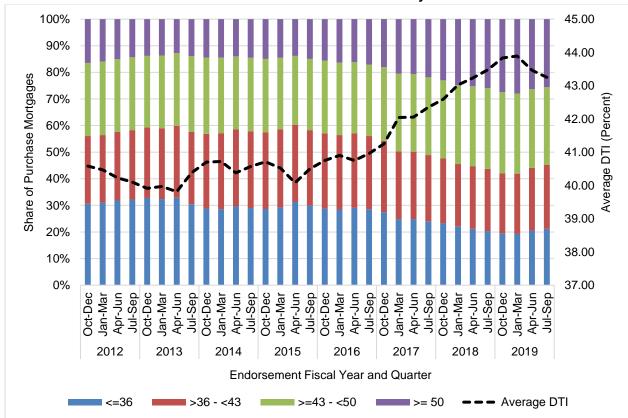

Exhibit 4. Debt-to-Income Ratios on New Endorsements by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM activity. SOURCE: U.S. Department of HUD/FHA, October 2019.

Average Loan-to-Value (LTV)

The average LTV slightly decreased from 92.44 percent to 92.39 percent for all FHA mortgages combined. Typically, LTV ratios of refinance mortgages are lower than home purchase mortgages. (Exhibit 5, Exhibit A-1, Exhibit A-5, Exhibit A-6). For a typical purchase mortgage endorsement, FHA charges an upfront mortgage insurance premium (UFMIP) of 1.75 percent of the loan balance. FHA permits borrowers to finance the UFMIP by having it added to the loan balance, and nearly all FHA borrowers do so. However, despite the increase in the loan balance, FHA reporting conventions have been, and remain, to report the LTV ratio on the loan balance without inclusion of the UFMIP. In the conventional market, custom would be to include a financed premium into the loan balance, and therefore the calculation of the LTV ratio. Additionally, in the conventional market for a low down payment mortgage, an Interested Party Contribution (IPC) in excess of 3 percent of the value of the home is treated as a reduction in the value of the home, resulting in an increase in the reported LTV ratio of the transaction. For FHA-insured mortgages, no downward adjustment is made to the value of the property unless an IPC exceeds 6 percent of the value of the home.

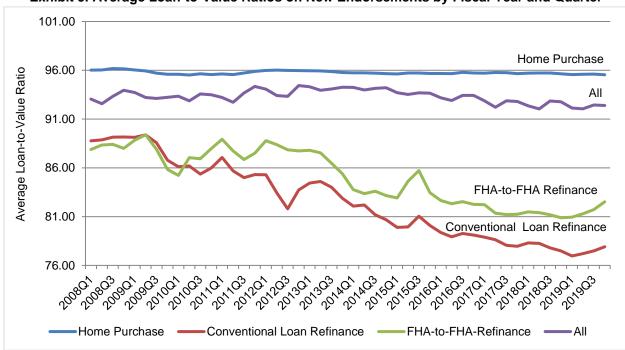

Exhibit 5. Average Loan-to-Value Ratios on New Endorsements by Fiscal Year and Quarter

NOTE: Excludes streamline refinance and HECM activity. SOURCE: U.S. Department of HUD/FHA, October 2019.

_

¹ Interested Party Contributions are contributions made to the borrower from an interested party to the transaction, customarily the property seller.

Predicted and Actual Termination and Claim-Loss Rates

The predicted-versus-actual comparisons through the fourth quarter of FY 2019 are presented in Exhibit 6. Prepayment speeds were lower than predicted. Claims were also below predictions. The number of actual claims through FY 2019 Q4 of 55,388 was 22.89 percent less than the predicted 71,832. That deviation comes from model forecasts and actuarial models deviating from actual experience. When institutional and/or borrower behaviors change, it can take a few years for the actuarial models to have enough data to reset the behavioral patterns to adapt to those changes (Exhibit 6).

Exhibit 6. Termination and Claim Loss Experience Compared to Forecasts

As of September 2019	Year to Date Predicted ^a	I Vear to Date Actual I (Ac		Percentage Deviation (Actual Versus Predicted)
Prepayments (number)	891,356	873,236	(18,120)	(2.03)
Claims (number) ^a	71,832	55,388	(16,444)	(22.89)
Claims (\$ millions)b	6,620	4,379	(2,241)	(33.86)
Net Loss on Claims (%) ^c	42.11	43.29	1.18	2.80

na = not applicable.

Note: Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report.

^a Projections of prepayment counts, claim counts, and claim dollars are modeled for the FY 2018 and FY 2019 FHA financial statements. All projections shown here use quarterly forecasts and thus reflect cyclical trends throughout the year.

^b Claim payments and counts reported here include those for conveyance (foreclosure) claims, pre-foreclosure (short) sales, and claims paid in connection with sales of delinquent mortgages. They do not include payments for loss mitigation mortgage-workout actions.

^c These rates are losses as a percentage of the defaulted mortgage balance, for both conveyance and pre-foreclosure-sale claims. Includes only mortgages in the MMI Fund.

Budget Execution Credit Subsidy Rates

The budget execution subsidy rate for forward mortgages for FY 2019 Q4 is -3.20 percent. The subsidy rate for HECM mortgages is -0.15 percent for FY 2019 Q4 (Exhibit 7).

Exhibit 7. Budget Execution Credit Subsidy Rates, FY 2019 Q4

Type of Mortgage	Rate (%) ^a
Forward Mortgages	-3.20
Reverse Mortgages (HECM)	-0.15

^a Budget execution credit subsidy rates are the expected net present value, per dollar of new insurance endorsements, of all cash flows from insurance operations over the life of the mortgage insurance as of the year of the insurance commitments. A negative rate means that the present value of premium revenues is expected to be greater than the present value of net claim expenses over the life of the insurance, i.e., a negative subsidy. Mortgages with negative credit subsidies are expected to produce receipts for the federal budget. These initial budget-execution rates are those approved by the Office of Management and Budget for budget accounting. The rates are updated on an annual basis, once the insurance is in place, to reflect both actual experience and updated forecasts of future mortgage performance and insurance cash flows. For a historical breakdown of credit subsidy rates and re-estimates, see https://www.govinfo.gov/content/pkg/BUDGET-2019-FCS/pdf/BUDGET-2019-FCS.pdf. SOURCE: U.S. Department of HUD/FHA, October 2019.

MMI Fund Cash and Investments

As Exhibit 8 shows, the cash and investments of the MMI Fund decreased to \$55.29 billion in FY 2019 Q4, \$4.28 billion is held in the Financing account, and \$51.01 billion is held in the Capital Reserve account.

Exhibit 8. MMI Fund Cash and Investments by Quarter, FY 2012-FY 2019

NOTE: Only end-of-year balances represent audited figures.

^a This is an on-budget account that records net receipts provided by FHA to the federal budget over time. Balances are held in cash and Treasury securities. The securities earn interest for FHA. Periods in which irregular changes to the balance are seen represent times when HUD transfers funds to/from the Financing account for the rebalancing required by annual budget reestimates.

^b This is a series of off-budget cash accounts used to manage insurance operation collections and disbursements.

^c Total is the sum of cash and investments in the Capital Reserve and Financing accounts. It excludes other assets and liabilities.

^d Capital Reserve Account and Financing Account may not always add to total because of rounding.

Cash Flows from Business Operations

FY 2019 Q4 net cash flow was \$701 million compared to FY 2019 Q3 of \$319 million (Exhibit 9). HUD has been proactive in reducing average losses per claim through a more diversified asset disposition strategy, which includes the Distressed Asset Stabilization Program (DASP), promotion of third-party sales at foreclosure auctions through its Claims Without Conveyance of Title (CWCOT) program, and expanded eligibility for pre-foreclosure (short) sales. Claim costs (as measured by loss rates) have decreased from a high of 65 percent in 2011 to less than 50 percent over the last four quarters.

Exhibit 9. Business Operations Cash Flows, FY 2019 Q1-FY 2019 Q4 (\$ millions)

	FY 2019 Q1	FY 2019 Q2	FY 2019 Q3	FY 2019 Q4	Past 4 Quarters

NOTE: Unaudited figures; details may not sum to total due to rounding. Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report.

^a Claim payments shown here include conveyance, pre-foreclosure sale, note sales, loss mitigation (home retention) actions, and all HECM claims (assignment and shortfall claims).

Early-Payment Delinquency Rates

The Early-Payment Delinquency (EPD) rate for mortgages originated in FY 2019 Q4 is down by 7 basis points from the previous quarter. Although EPD rates have fallen from last quarter, FHA is monitoring the significant increase from the same period last year. Much of this increase is likely attributable to a shift in volume from higher credit score endorsements to lower credit score endorsements (see Exhibit 3a on page 5). Typically, lower credit score mortgages perform much worse than higher credit score mortgages. FHA made underwriting changes to its TOTAL Scorecard in FY2019 Q2 which may reflect improved EPD rates in coming quarters.

Exhibit 10. Early Payment Delinquency Rates

^a Percent of mortgages originated in each quarter for FHA insurance that experience a three-month delinquency in the first six payment cycle. *only includes January and February SOURCE: U.S. Department of HUD/FHA, October 2019.

Serious Delinquency Rates

Serious delinquency (SDQ) rates for this quarter increased to 3.88 percent, up 12 bps from last quarter. As the portfolio serious delinquency rate has reached historic lows and FHA credit profile shifts, FHA may see increases in SDQ rates going forward. For all cohorts, mortgages with DPA have typically underperformed those without DPA (Exhibit A-10).

SDQ rates tend to be somewhat seasonal and may fluctuate along current levels. Overall, serious delinquency rates are significantly improved from the highs seen in 2012.

NOTES: Shares are based on loan counts. Excludes streamline refinancing.

^a Credit scores are cobranded between the three major credit repositories (Equifax, Experian, TransUnion) and Fair Isaac Corporation (FICO). Values can range from 300 to 850. FHA policy permits credit scores of 580 and above, except for loans with equity positions of 10 percent or more, which may have credit scores as low as 500. They are grouped here according to the "decision" score used for loan underwriting. The decision score represents the weakest borrower on a loan application when there are multiple applicants. Streamline refinance loans do not require full underwriting; therefore, they are not represented here. SOURCE: U.S. Department of HUD/FHA, October 2019.

NOTES: Shares are based on loan counts. Excludes streamline refinancing.

^a In accordance with statutory requirements for determining eligibility of loans for FHA insurance, HUD measures loan-to-Value (LTV) ratio without including any financed mortgage insurance premium in the loan balance.

^b The statutory maximum LTV since October 1, 2008, is 96.5 percent. Prior to October 1, 2008, the statutory maximum was 97 percent, with higher allowances for borrowers financing loan closing costs into the mortgage balance. If there was such financing, then the statutory maximum was between 97 and 98.15 percent, depending on the geographic location and price of the property.

NOTE: Real Estate Owned (REO) refers to properties that HUD has assumed ownership of through the conveyance of title.

^a July and August 2019 only.

^b REO alternatives comprise short sales, claims without conveyance of title (CWCOT), and note sales. Short sales refer to the sale of property where the defaulted borrower sells his/her home and uses the net sale proceeds to satisfy the mortgage debt even though the proceeds are less that the amount owed. Short sales are part of the pre-foreclosure sale (PFS) program. CWCOT is a program approved under Section 426 of the Housing and Urban-Rural Recovery Act of 1983. It is designed to reduce the number of single-family mortgages owned by HUD by authorizing the payment of claims to mortgagees without conveying (transferring) the title to the property to HUD. Note Sale refers to the sale of defaulted mortgage notes in order to reduce foreclosure costs for borrowers. Note Sales are conducted through the Distressed Asset Stabilization Program (DASP). SOURCE: U.S. Department of HUD/FHA, October 2019.

NOTE: The Claim Type 1 category represents the dollar volume of claims generated when the borrower no longer occupies the home, and the property is sold at a loss, with the mortgage never being assigned to the HUD Secretary D. The Claim Type 2 category represents the dollar volume of claims resulting from the assignment of the mortgage to the HUD Secretary when the mortgage reaches 98 percent of the MCA. Supplemental claims are those claims submitted by lenders for other eligible expenses not included on original claims, such as property preservation expenses. Due to differences in timing and data sources, cash flow amounts may not reconcile fully with other tables in this report.

^a Claims comprise claim types Foreclosure, Deed in Lieu of Foreclosure, and Mortgagor's Short Sale.

^b Details may not sum to total due to rounding.
